

Agro advisory based on advices received from the experts of Agromet Advisory committee

Crop	Stage	Agromet Advisory
Moong	Sowing	Moong should be sown from second fortnight of March to 10 th April. Sowing of moong varieties like Pant moong-5, Samrat etc should be done in lines at 25-30cm and at 3-4cm depth. Seed rate should be 20-25 kg/ha.
Wheat, Barley	Spike development	Keeping in view the rainfall condition in coming days, farmers are advised to stop irrigation for next few days in all the crops.
Sugarcane	Late-Sowing	Sowing of spring season sugarcane crop should be completed up to 15 th March. Upper 2/3 part of sugarcane should be used for sugarcane seed. 40-50 thousand pieces of three eyed sugarcane should be used. Line should be prepared at a distance of 75cm in East-West direction for sowing sugarcane crop.
Sunflower	Sowing	Sunflower varieties like Mordan, Surya should be sown.
Onion, tomato	Vegetative Growth	Weeding and hoeing should be done in onion and tomato crop.
Okra	Sowing	Sowing of Okra crop should be done.
Cucurbits crops	Sowing	Sowing of cucurbits crop should be done.
Horticulture		Cleanliness of orchard should be.
Mango	Flowering	Irrigation should not be given at the time of flowering in mango.
Animal Husbandry	-	To prevent Puerperal Fever in Pregnant animals, 50-60 grams of mineral mixture should be fed to them every day to boost their immunity. Animals are prone to sterility and Johne's disease (Paratuberculosis) during this time. They should provided immediate treatment for these. To save the buffalo calf from patera disease, 10-15Cc Neem oil should be given to the calf immediately after 10 days of his birth. Again after 10 days, 10-15 CC Neem oil should be given.
