### SMS Advisory:

Light to moderate rain may likely occur in the coming five days.

### Crop Specific Advisory:

<b>Crop(Varieties)</b>	<b>Crop Specific Advisory</b>
RICE	Keeping in view the forecast of rain in the coming days, prepare the field for transplanting paddy. Transplanting of early maturing variety of paddy should be completed till the third week of July. Before transplanting the seedlings of paddy, roots should be dipped for half an hour in the solution of Carbendazim @1g/liter of water.
SUGARCANE	Arrange for drainage in waterlogged fields in sugarcane crop.
MAIZE	Keeping in view the possibility of rain in the coming days, do not irrigate the maize crop.
GINGER	Keeping in view the possibility of rain in the coming days, do not accumulate the rain water in the field.

#### **Horticulture Specific Advisory:**

<b>Horticulture(Varieties)</b>	<b>Horticulture Specific Advisory</b>
CAULIFLOWER	Keeping in view the weather forecast, proper drainage should be maintained in the field of Cauliflower.
GUAVA	Planting of fruit crops like mango, guava, litchi should be done during this month.

#### **Live Stock Specific Advisory:**

<b>Live Stock(Varieties)</b>	<b>Live Stock Specific Advisory</b>
BUFFALO	Calcium Chloride Gel should be given in about 200 ml quantity 24 hours before the calving of more milch animals. Give it on the day of calving and also after calving, so that the animal does not get a disease called milk fever.
