#### Weather Summary/Alert:

In the last seven days (17–23 Feb, 2023), there was 8.4 mm rain and the sky was clear to p-cloudy. The maximum & minimum temperatures ranged between 27.0 to 31.0°C and 9.0 to 14.0°C respectively. Relative humidity ranges from 75 to 95 % at 0712 hrs and 36 to 56 % at 1412 hrs. The wind was mainly from the WSW, ESE & WNW with a speed of 0.9 to 5.6 km/hour. In the coming five days, weather will remain clear. Maximum & minimum temperature may range from 28.0 to 30.0 deg C & 8.0 to 15.0 deg C respectively. Wind will blow with a speed of 6.0 km/hr from the E, NW, SE & ESE direction.

#### **General Advisory:**

High diurnal variation in temperature is conducive for the spread of cold and flu. People (especially the children and elderly) are advised to wear woolen/warm clothes during morning/night times to be protected from diurnal variation in temperature. There is a high chance of reduction in soil moisture for agriculture field/orchards due to high temperature so, farmers are advised to irrigate the crops/orchards to reduce the impact of high temperature. IMD Weather forecast and Agrometeorological advisory of your location is now available on Meghdoot mobile app in English and regional languages. Kindly download from following link Android: https://play.google.com/store/apps/details?id=com.aas.meghdoot iOS:

https://apps.apple.com/in/app/meghdoot/id1474048155 NDVI data received from ISRO-IMD Vegetation Information System indicated that the NDVI ranged between 0.01-0.4 for different villages in U S Nagar district.

#### **SMS Advisory:**

In the coming five days, weather will remain clear. Farmers are advised to irrigate the crops/orchards to reduce the impact of high temperature.
