Weather Warnings (Valid Till 08:30 IST of the next day)

No significant weather warning.

Likely impacts of weather warnings on Agriculture and associated Agromet advisories

No significant impact of weather warning and associated agromet advisory.

General Advisory:

The farmers and other related community can download the "Mausam" app for regular weather information and rainfall alerts. Other apps like "Meghdoot" and "Damini" are also available for regular update of meteorological and lightning data, respectively. All the apps can be easily downloaded from Google Play Store (Android users) and App Centre (iOS users). The extended range forecast shows deficient pattern for rainfall , normal maximum and minimum temperature trend during 12.12.2025 to 18.12.2025.

SMS Advisory:

As per IMD, no warning has been issued so the farming activities should be continued as scheduled and irrigation should be applied as required by the crop.

Crop Specific Advisory:

Crop (Stage)	Crop Specific Advisory
CHICK PEA (Vegetative)	In case of late sowing, the sowing operations should be completed till first fortnight of the month and the crop should be regularly monitored for hoeing and weeding.
LENTIL (Vegetative)	In case of late sowing, the sowing operations should be completed till first fortnight of the month and the crop should be regularly monitored for hoeing and weeding.
RAPESEED (Vegetative)	Irrigation should be applied as per requirement and in case of pest/disease attack, recommended practices should be followed.
MUSTARD (Vegetative)	Irrigation should be applied as per requirement and in case of pest/disease attack, recommended practices should be followed.
WHEAT (Seedling Growth)	First irrigation in timely sown crop should be applied after 20-25 days. 3-4 days after irrigation application top dressing of urea should be done. The weeding and hoeing of the field should be done at 25-30 days and 45-50 days interval.
BARLEY (Seedling Growth)	The timely sown crop should be irrigated at 20-25 days interval, after which top dressing of urea should be done.
BARSEEM (Vegetative)	The fodder crops should be monitored and under dry conditions irrigation should be applied. After irrigation top dressing of urea should be done.

Horticulture Specific Advisory:

Horticulture (Stage)	Horticulture Specific Advisory
CAULIFLOWER (Harvesting)	Light irrigation should be given in the cauliflower. Harvest the mature flower head. To control the leaf spot disease in cole crops, mancozeb 75 WP should be applied 2-3 times. Hot water seed treatment should be used to control the disease.
VEGETABLE PEA (Sowing)	Sowing can be done @80-120 kg/ha with the line to line distance of 30-45 cm and plant to plant distance of 5-10 cm. Irrigation should be applied just after sowing and monitoring should be done of the growing crop.
RADISH (Sowing)	Sowing of root crops can be done like radish/carrot/beetroot and irrigation should be applied just after sowing.
TOMATO (Harvesting)	On the shrinkage or getting piebald of upper leaves of tomato, infected plants should be removed and destroyed. The crop should be checked for disease transferring insects and controlled accordingly. Mature tomato fruits should be harvested.

Live Stock Specific Advisory:

Live Stock	Live Stock Specific Advisory
BUFFALO	During winters, the amount of extra energy giving food items should be increased by 25 percent. The tied animals should be released for exercise and should be kept under the sun.
COW	During winters, the amount of extra energy giving food items should be increased by 25 percent. The tied animals should be released for exercise and should be kept under the sun.
GOAT	Animals should be taken to graze grass only when the frost dries up, otherwise they are at risk of getting enterotoxemia from frosty feed. Animals should be brought to the enclosure on time to protect them from cold.
SHEEP	Animals should be taken to graze grass only when the frost dries up, otherwise they are at risk of getting enterotoxemia from frosty feed. Animals should be brought to the enclosure on time to protect them from cold.

Others (Soil / Land Preparation) Specific Advisory:

Others (Soil / Land Preparation)	Others (Soil / Land Preparation) Specific Advisory
GENERAL ADVICE	On occurrence of frost/fog, irrigation should be applied to the fields at regular intervals.

Likely impacts of weather warnings (General)

No significant impact of the weather warnings.

Impact based advisories (General)

No significant impact based advisory.

Farmers are advised to download Unified "Mausam" and "Meghdoot" android application on mobile for Weather forecast and weather based Agromet Advisories and "Damini" android application for forecast of Thunderstorm and lightening.
