Forecast Summary:

Last seven days (16 to 22 January) observed no rainfall with maximum and minimum temperature varying between 10.5-25.0 and 2.4-6.8°C, respectively. The weather was observed to be clear on few days. The morning and evening relative humidity varied between 92-100% and 35-64%, respectively. The wind speed mostly ranged between 1.0-4.5 kmph blowing primarily from the west-south-west, east, west-north-west, west and south-south-west direction. The upcoming 5 day forecast shows light rainfall of 0-15 mm with maximum and minimum temperature varying between 20.0-23.0°C and 6-9°C. The wind speed is expected to be 5-20 kmph from south-west, west-north-west and east-north direction. Yellow warning regarding thunderstorm, lightning, squall, hailstorm and strong surface winds has been given for 23 and 27 January.

Weather Warnings (Valid Till 08:30 IST of the next day)

Yellow warning regarding occurrence of thunderstorm, lightning, squall and strong surface winds.

Likely impacts of weather warnings on Agriculture and associated Agromet advisories

Lodging in crops due to strong winds. Avoid irrigating and postpone any chemical application in crops.

General Advisory:

The weather forecast and agrometeorological advisory is regularly updated on the "Meghdoot App" and "Damini App" is also available to get lightning information. Meghdoot and Damini apps can be downloaded from Google Play Store (Android users) and App Center (iOS users). The extended range

forecast system indicates large excess rainfall, normal maximum and below normal minimum temperature trend from 23 to 29 January.

SMS Advisory:

As per IMD strong surface winds, squalls, thunderstorm and lightning has been predicted so avoid irrigating the crop.
